About Me

I am currently pursuing a bachelor's degree in Computer Science & Engineering.

I am a UI & UX Designer, passionate about making designs that are unique and change the way users percieve an interface. I have worked on several personal and professional UI Design projects.
I am extremely passionate about my craft and enjoy learning new design techniques everyday.

My hobbies include origami art and I also sketch occasionally :)

My Portfolio

I have worked on several personal and professional projects, all of which have been submitted on behance.

The link to my behance portfolio is below

Fundamentals Of Graphic Design, Coursera
Jul 2020 – Aug 2020

Work Experience

UI & UX Design Intern

Kudosware

April 2021 – July 2021

- Worked as a UI designer and User Experience Researcher for one of their leading projects.
- Took on responsibilities like delivering high fidelity mock-ups, designing user flows and the user journey for their 'Influencer Marketing Application' and designed a website for the same.
- Designed web pages for their 'Debt Relief' Project.

Projects

Influencer Marketing Website Design

July 2021

'Infabrands' is a platform that brings together the Influencer Community and Brands seeking for Social Media influencers to promote their products. I contributed as the UI designer and designed web pages for their website.

FundN'GO – Web Application

Jun 2021

A secure funding platform for the donors to ensure that all of their money reaches the right cause. We have taken a step to make the funding decentralized, secure, and more transparent.
I have worked as the UI design lead for this fun project. My main contributions for FundN'GO include:
• Designing landing pages and other screens for the project
• Choosing the right color palettes and visual components to enhance the user experience
• Recognizing and empathizing the end-users of this web application and coming up with the best user journey and mapping out a relevant flow.
• Collaborating with the developers to understand the technical aspects of the app and optimizing the overall functionality of this project.
• Prepared slides and mock-ups for project presentations

EduLog – Student App Concept UI Design

Jun 2021

EduLog is a Student App Concept, designed for students to keep track of their Classes, Subjects and Study material. This app is designed keeping in mind, young learning children, allowing them to use and navigate through the app easily. The trick is to keep interactive buttons colourful and the screen clutter-free

Event Management Website Design

Mar 2021

Lush Events Website UI Design is a personal project of mine to explore my skills as a designer. It is a representation of an event management team website. For this project, my focus was on the contrasts and combination of colours, fonts and images to make it look asthetic.

File Sharing App – Neumorphic UI Design

Aug 2020

This design is for an app with the concept of sharing different types of files from one device to another. The app is designed on a neumorphic theme. This adds a unique look and feel to this application, making file sharing a great experience.
This is a personal project created to improve my UI/UX skills and also happens to be my first neumorphic design
