Projects

Employ Chain Web Design
November 2021
Employ Chain is a hiring platform that allows Employers to post job requirements and Employees to apply for these jobs. The project stands out from other hiring platforms due to it's clutter-free User Interface and Consistency in components.

Aadhaar Verification App Design
October 2021
This project was built for the Aadhaar Hackathon 2021, where we worked on a mobile application for verifiers and residents to safely communicate between eachother. With this project, we managed to secure 3rd place in the hackathon. I worked as the UI and UX designer for this project, where I designed a mobile app for the verifier and the residents to interact effectively during verification process.

DeBuilds – Web Application
August 2021
DeBuilds is a Decentralized Software Marketplace for devs/users to sell or buy software with NFT License.
I contributed as the UI Designer for this project. I have designed Landing pages as well as the user flow for this Web Application.

Influencer Marketing Website Design
July 2021
'Infabrands' is a platform that brings together the Influencer Community and Brands seeking for Social Media influencers to promote their products. I contributed as the UI Designer and designed web pages for their website.

FundN'GO – Web Application
Jun 2021
A secure funding platform for the donors to ensure that all of their money reaches the right cause. We have taken a step to make the funding decentralized, secure, and more transparent.

Event Management Website Design
Mar 2021
Lush Events Website UI Design is a personal project of mine to explore my skills as a designer. It is a representation of an event management team's website.

File Sharing App – Neumorphic UI Design
Aug 2020
This design is for an app with the concept of sharing different types of files from one device to another. The app is designed on a Neumorphic theme. This adds a unique look and feel to this application, making file sharing a great experience.

My Portfolio

I have worked on several personal and professional projects which can be accessed through my portfolio.
